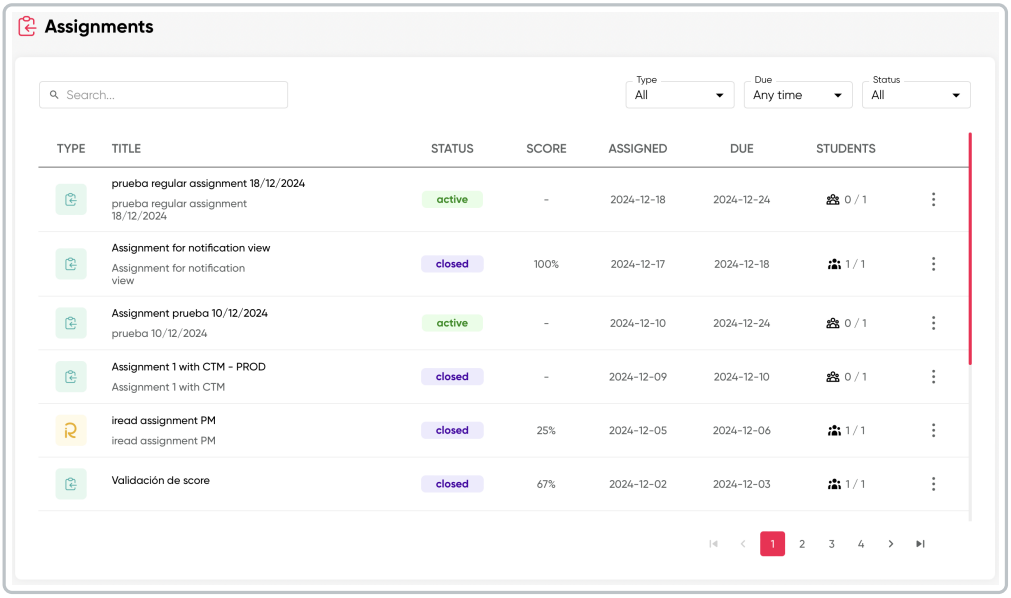
This section centralizes all **activities, assignments, and assessments assigned** by teachers, allowing for clear and organized management of academic work.



Provides a comprehensive overview of the status of assignments, making it easier to track, manage, and evaluate them.

Available Information

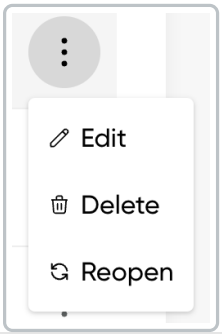
Each assignment displays the following information:

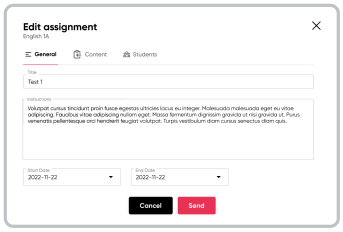
- **Assignment type:** iRead (Yo leo), test, or other activities.
- **Class:** The class it belongs to.
- **Activity status:**
  - Active
  - Not started
  - Closed
- **Score:** Expressed as a percentage.
  Indicates whether there are pending grades.
- **Assignment date**
- **Due date**
- **Number of students who have submitted the activity**

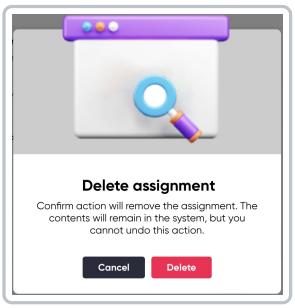
Activity Management

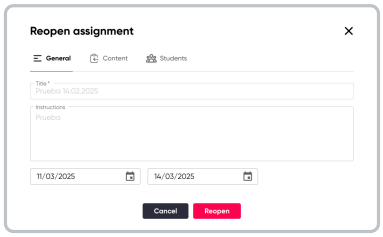
Each activity includes an options menu (three-dot icon) that allows you to:

- Edit the assignment
- Delete it
- Reopen it



Edit option	Delete option	Reopen option
		






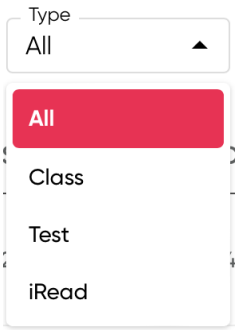
Important:
Once a student has submitted the activity, **it cannot be edited or deleted.**

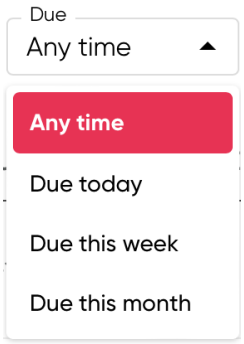
Search and Filters

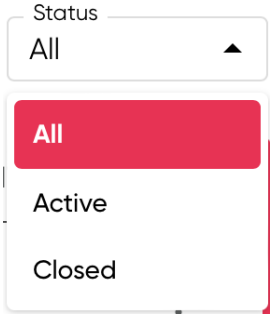
To make it easier to locate tasks, the section includes:

- **Search bar**
- **Filters by:**
  - Assignment type
  - Status
  - Due date

Type filter	Due date filter	Status filter

Type filter	Due date filter	Status filter
		






Auto-Submit Functionality

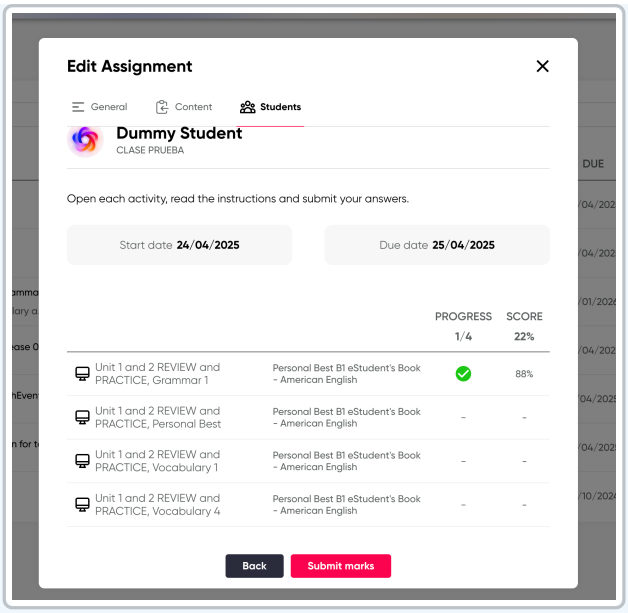
The Auto-Submit feature is automatically activated when the time allotted for a task ends and the student has not clicked.

At that moment:

- The system automatically submits the completed responses.
- Information loss is prevented.
- The teacher receives the student's progress up to that point.

Results Display

- Uncompleted activities are shown with a **dash (–)** in the **Score** column.
- If a student completes only some activities, the **overall average** is calculated based only on the completed activities.



Time Consideration

Once the due date is reached, the automatic submission (Auto-Submit) is carried out at 10:00 CET (Central European Time).

Benefits

- Centralizes the management of assignments and assessments.
- Facilitates tracking the status of activities.
- Improves teacher organization.
- Ensures that student work is not lost.
- Enables quick navigation through search and filters.

Note:
<Additional Resources> are not assignable, especially **.html** files.

Consider:

- Validate settings before publishing an activity.
- Take into account editing restrictions after submission.
- Use filters to optimize the management of large volumes of assignments.
- Consider the impact of Auto-Submit on assessments.
