The **<My Downloads>** section allows you to manage all content that has been downloaded for offline use.

In this section, you will be able to:

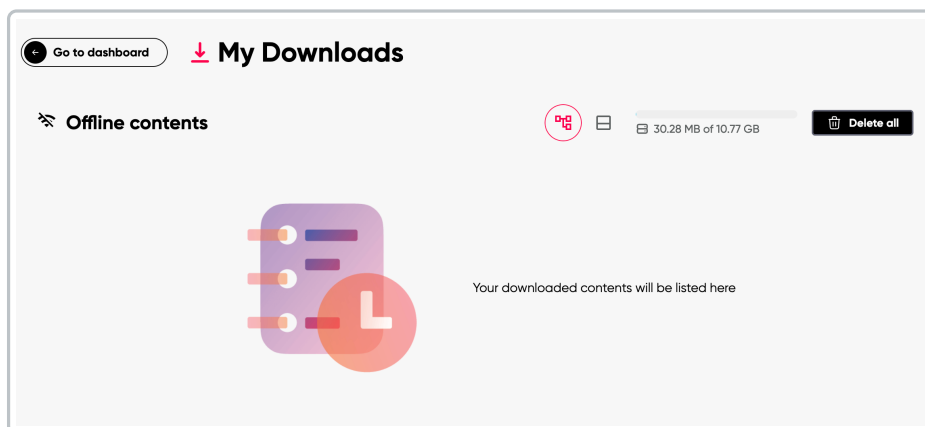

- View the content downloaded on your device.
- Access materials without the need for an internet connection.
- Manage the storage space being used.

When there is no downloaded content, the following message will be displayed:

"Your downloaded contents will be listed here"

Offline Content

The **<Offline contents>** header indicates that all materials available in this section can be used without an internet connection.

Storage Usage

At the top right, you will see:

- The used space (e.g., 35.05 MB)
- The total available space (e.g., 10.77 GB)

This allows you to monitor how much storage you are using on your device.

 11.98 MB of 10.75 GB

Display Options

You can change how content is displayed using the available icons:

- Grid view
- List view

This makes it easier to organize and locate downloaded materials.

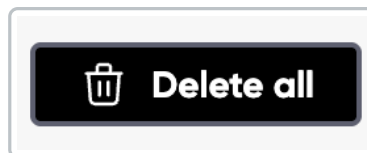

Delete Content

To remove downloaded files:

- Click the <Delete all> button.
- All content stored in this section will be deleted.

Note: This action will free up space but will remove offline access to the materials.

Benefits

- Access to materials without an internet connection
- Savings on mobile data usage
- Control over device storage
- Flexible organization of downloaded content

Important Note

- For content to appear in this section, it must first be downloaded from classes or materials.
- If you do not see any files, it means that no downloads have been made yet.
